New · Version 1.2

Follow your bus to your stop.

BusBoard NL got a full redesign, a smoother live map and a feature I've wanted since day one.

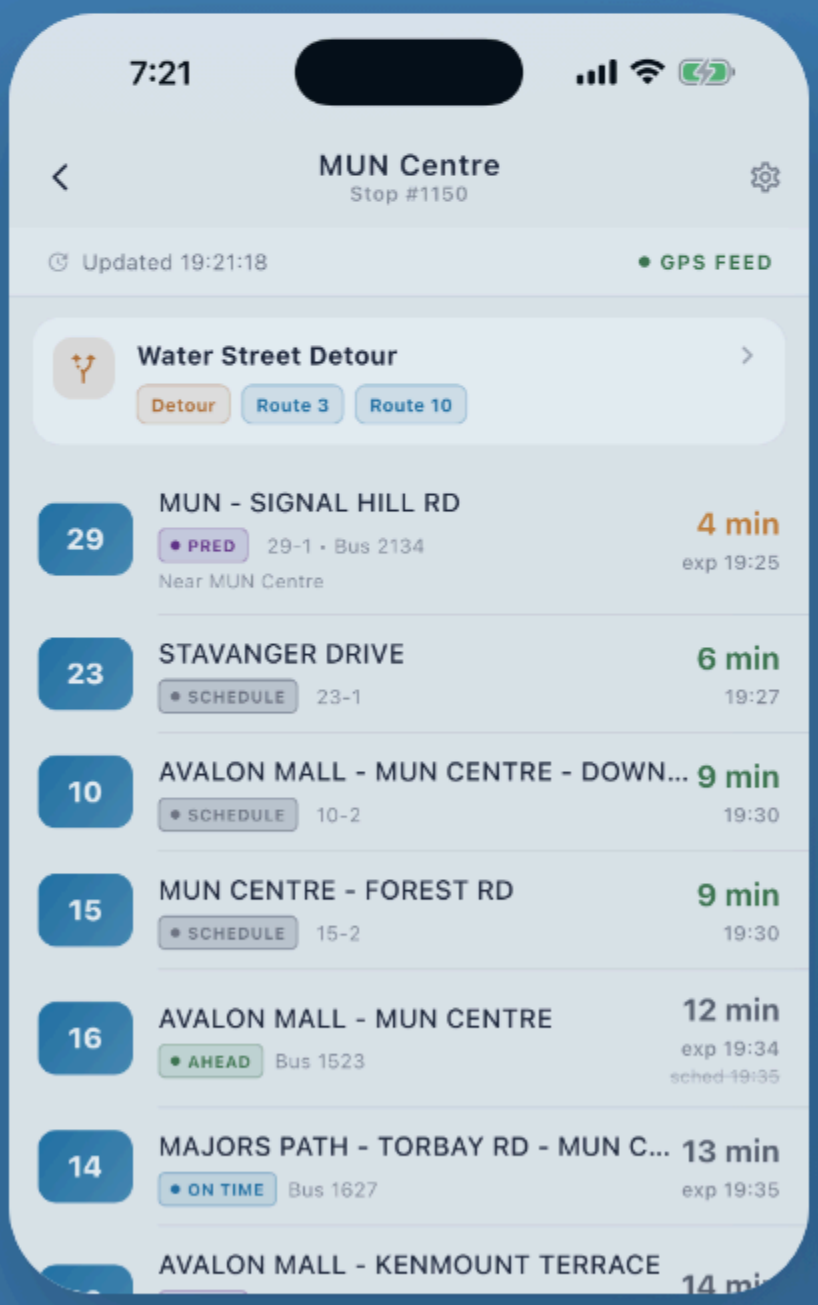

BusBoard NL

A WHOLE NEW LOOK

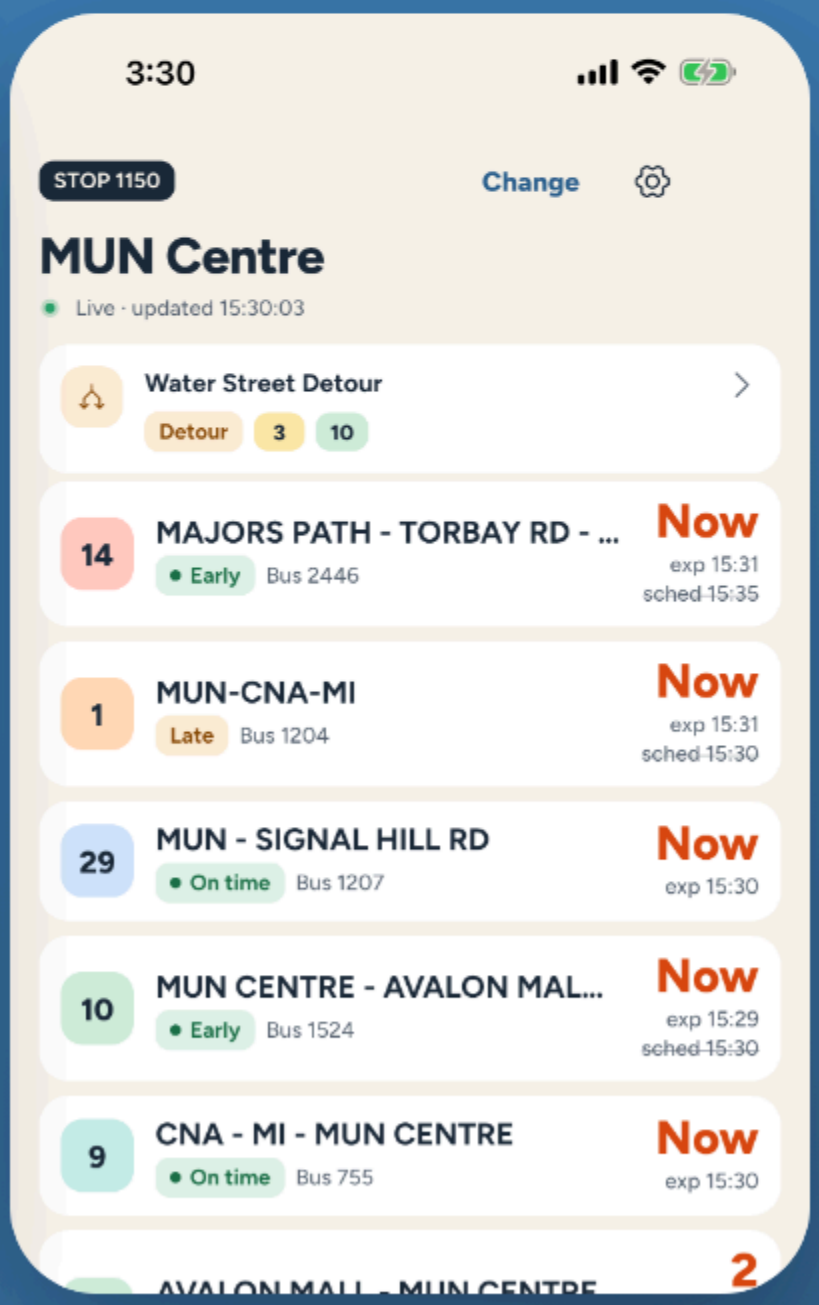

Same data. Much clearer.

Route colours, calmer layouts, light and dark themes.

BEFORE

NOW

BusBoard NL

NEW

Tap a bus. Follow it.

Tap any live arrival and the map follows that bus to your stop.

Its route

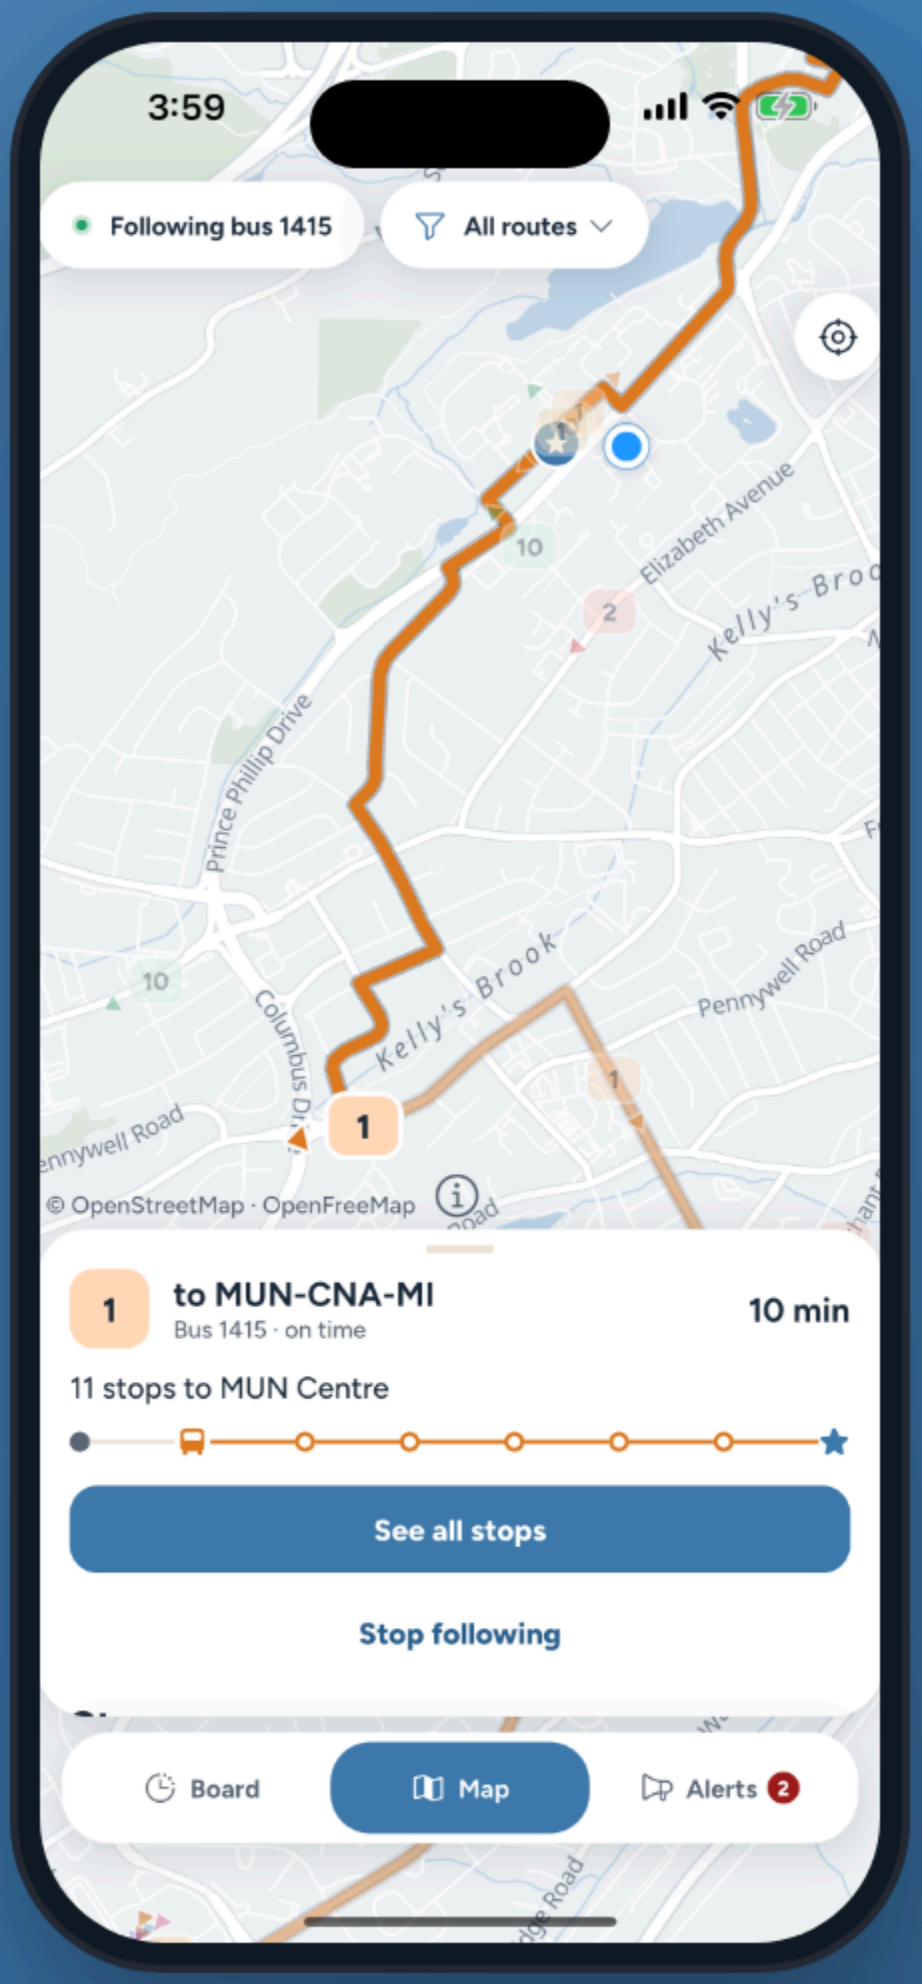

Driven part faded, the rest ahead

Stops left

"4 stops to MUN Centre"

Minutes away

Live, until it arrives

BusBoard NL

REBUILT LIVE MAP

Buses move like buses.

I recorded two hours of real rush-hour data and replayed it to retune how every bus moves.

0

~~14~~

jumps over 100 m

3×

less time with a dot stuck while its bus is moving

28 m

~~1.1 km~~

worst drift on route 14's loop

0

~~5~~

dots sliding back along their route

BusBoard NL

STILL THE BASICS, DONE BETTER

Everything you check at the stop.

🚌 **Live arrivals**

Predictions next to the schedule, early or late at a glance

🗺️ **Every bus on the map**

In its route colour, updated live

📍 **Stops near you**

Or type the number on any stop pole

⚠️ **Detours and alerts**

Official Metrobus alerts, matched to your stop

🌙 **Dark mode and larger text**

Plus screen-reader support

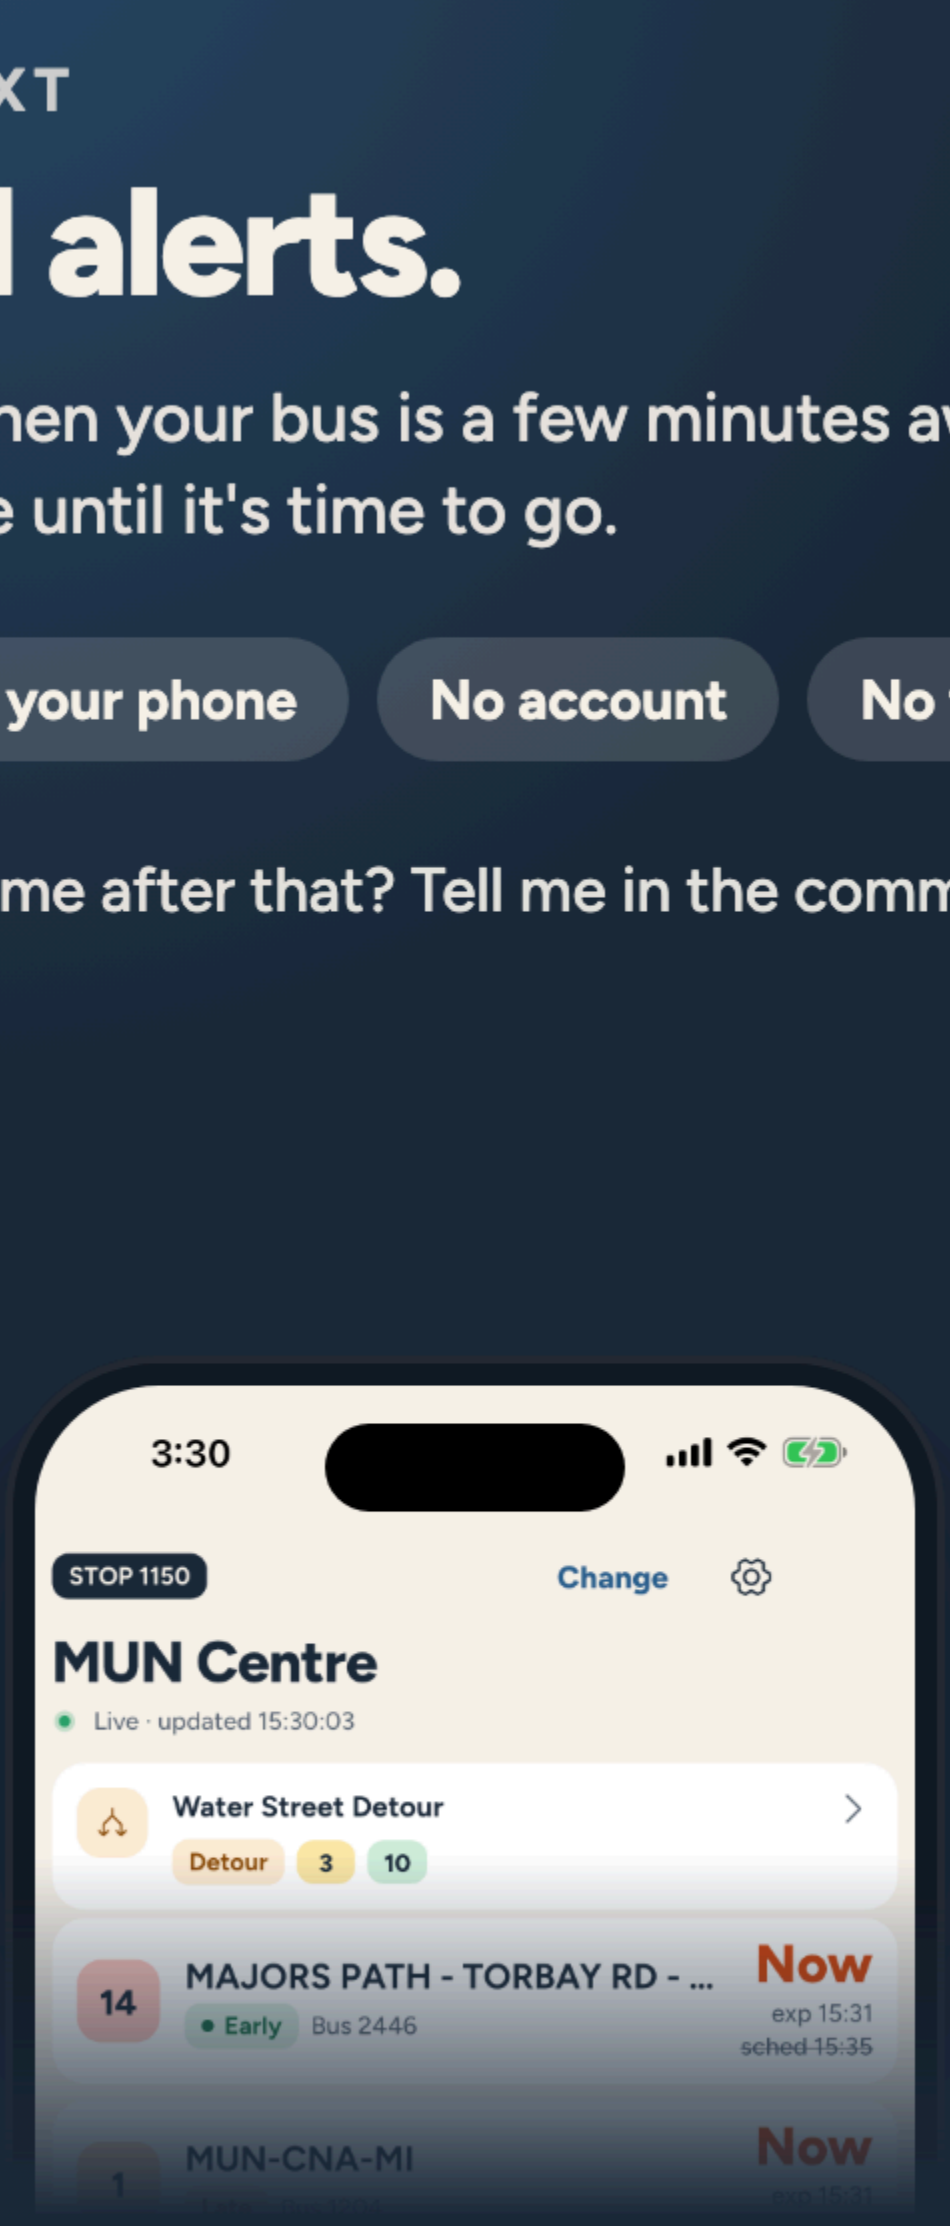

COMING NEXT

Arrival alerts.

A heads-up when your bus is a few minutes away, so you can stay inside until it's time to go.

Worked out on your phone **No account** **No tracking**

What should come after that? Tell me in the comments.

BusBoard NL

FREE ON IOS AND ANDROID

Free.
No ads.
No account.

Built in St. John's for Metrobus riders, on Metrobus open data.
